Expertise : HTML5 | CSS | JavaScript | ES6 | Bootstrap | Tailwind | React | Redux | Mongodb | Mongoose
Comfortable : Firebase | Rest APIs | Express.js | Stripe |
Familiar : Node.js | Next.js
Tools : Git | Vercel | Netlify | Vs Code | Figma | Debugging | DevTools | JWT
Soft Skills : Strong Communications Abilities | Quick Decision Maker | Strong Leadership Power

Projects

1. Job Swift (ATS based website)[Team Project] [Live Link](#) | [Client Site GitHub](#) | [Server Site GitHub](#)

Technologies used : React | Redux | TailwindCSS | DaisyUI | Firebase | Express.js | Mongodb | JWT

- It helps employers manage job applications and simplify the hiring process by automating tasks like resume collection and candidate screening, schedule interviews, and manage the overall hiring workflow
- Employers post job listings to various job boards, share in social-media and track their performance.
- It streamlines candidate tracking and enhances employer-applicant communication.
- ATS systems create a searchable candidate database for future hiring needs.

2. Sports Academy (E-Commerce Website) [Live Link](#) | [Client Site GitHub](#) | [Server Site GitHub](#)

Technologies used : React Js | TailwindCSS | DaisyUI | Firebase Authentication | Express.js | Mongodb | JWT

- Online booking of the different classes with three user roles students, instructors and admin are controlled with a private route, Specific user route .
- Admin controls all users like making a user instructor and admin. Admin can approve, deny and delete the instructor submitted class courses and also send the feedback to the instructor.
- Website is responsive for mobile, laptop and desktop. All the generated data is integrated with the backend. Stripe payment method implemented in this project for buying a specific class course.
- Secure API and awesome UI UX that makes a unique user inter

3. Toys Zone (E-Commerce Website) [Live Link](#) | [Client Site GitHub](#) | [Server Site GitHub](#)

Technologies used : React Js | TailwindCSS | DaisyUI | Firebase Authentication | Express.js | Mongodb | JWT

- Users must create their account by using the Firebase Authentication system.
- Users can submit their products, delete and update their products.
- Implement the private route of the particular user.
- Responsive for mobile, tablet & desktop device
